

MAHLE S/4HANA Transformation

Information Package | December 2021

The SAP S/4 transformation depicts a key part among other IT projects of the MAHLE Digital Backbone

Digital Backbone of MAHLE

MAHLE's S/4HANA transformation at a glance

Vision

Key transformation to modernize MAHLE on a global level to create an **optimized real-time enterprise**

Mission

The implementation of SAP S/4HANA brings more power to MAHLE worldwide.

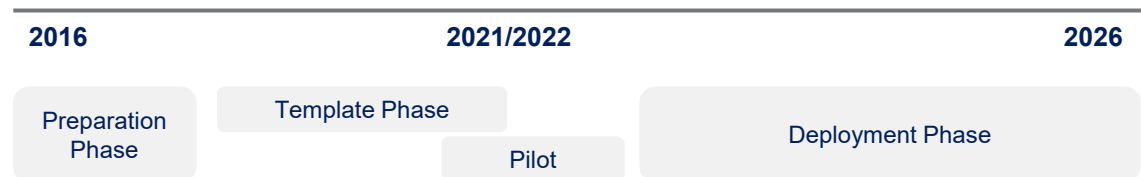

A globally standardized and harmonized ERP system creates real-time transparency about markets, customers, orders and resources.

This maximizes added value and leads to future readiness through innovation.

Main Objectives

-  The global standardization and harmonization of all business processes
-  The migration of the underlying IT systems to SAP S/4HANA
-  The establishment of a global governance organization

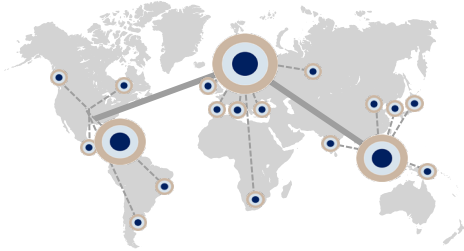

Approach

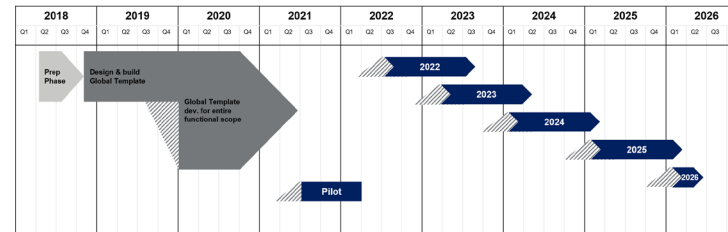

The MAHLE S/4HANA deployment on a global scale

160 locations

3 Regional
Deployment Hubs

6 deployment waves

12 parallel teams

5 years

The deployment of MORE starts with the pilot in 2022. Until 2026, whole MAHLE will benefit from the new standardized and optimized ERP process platform based on the latest SAP S/4HANA technology in all MAHLE regions around the globe.
